- Published essay in Law Review
- Rosalee Wall Moot Court

SUMMARY

Personable, diligent, and passionate full-stack web developer seeking to build great products with a dynamic employer. Recently earned a certificate for full-stack web development at Georgia Institute of Technology after studying code independently for over a year. I thoughtfully plan out projects and implement strategic collaboration to maximize project success. Imaginative design, efficient and effective code, complex problem-solving, and adherence to timeliness and profitability measures...let's build great things together.

SKILLS

Languages: JavaScript ES6+, CSS, HTML5, Markdown

Applications: GitHub, Heroku

Tools: Express, Node.js, jQuery, Bootstrap, API and npm usage, Node Express, MySQL

Projects

README.md Generator | Deployed through GitHub | https://github.com/uknity/Readme_Generator

- Dynamic generator that easily generates a README.md based on answers to user prompts
- Includes licensing options, licence badges, GitHub stats, and most-used languages summary
- Technical skills used: Markdown, JavaScript, Node.js

PokeTrade.io | Deployed through GitHub | https://github.com/uknity/poketrade

- Pokemon trade card evaluator created collaboratively...allows users to find their Pokemon cards, add them to their collection page, and to evaluate whether a potential trade is profitable
- Utilizes Pokemon card API to pull cards and value and a currency exchange API to allow values to be converted throughout the world
- Technical skills used: JavaScript, CSS, Bootstrap, public API usage, local storage

Weather Dashboard | Deployed through GitHub | https://github.com/uknity/Weather_Dashboard

- Provides a current and 5-day forecast for any city in the U.S.
- Stores searches in local storage for easy access
